FUND SUMMARY

Investment Objective

The Fund seeks to provide long-term total return, which includes income and capital appreciation, while considering capital preservation.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

Shareholder Fees (fees paid directly from your investment)

Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None
Maximum Deferred Sales Charge (Load)(as a percentage of original sales price or redemption proceeds, as applicable)	None
Redemption Fee (as a percentage of amount redeemed on shares held 90 days or less)	2.00%
Exchange Fee	None

Annual Fund Operating Expenses (expenses that are deducted from Fund assets)

Management Fees	0.50%
Distribution (12b-1) Fees	None
Other Expenses	0.08%
Total Annual Fund Operating Expenses	0.58%
Expense Reimbursement(1)	0.09%
Total Annual Fund Operating Expenses after Expense Reimbursement	0.49%

(1) First Pacific Advisors, LLC (“Adviser” or “FPA”), the Fund’s investment adviser, has contractually agreed to reimburse the Fund for Total Annual Fund Operating Expenses in excess of 0.49% of the average net assets of the Fund (excluding brokerage fees and commissions, interest, taxes, shareholder service fees and expenses of other funds in which the Fund invests, and extraordinary expenses) through January 31, 2018. This agreement may only be terminated earlier by the Fund’s Board of Directors (the “Board”) or upon termination of the Advisory Agreement.

Example: This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

One Year	Three years	Five years	Ten years
\$50	\$157	\$274	\$616

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 44% of the average value of its portfolio. The Fund’s portfolio turnover rate may vary from year to year as well as within a year.

Principal Investment Strategies

The Fund’s portfolio managers (“portfolio managers”) primarily invest in a diversified portfolio of debt securities, cash and cash equivalents. The portfolio managers will, under normal circumstances, invest in the following instruments, among others:

- Fixed income securities, including:
 - o Corporate bonds, municipal bonds, bank loans, bonds issued by governments and their agencies and instrumentalities, mortgage-backed pools, sovereign debt, and supra-national agency obligations; and
 - o Structured investments, commercial mortgage-backed securities, residential mortgage-backed securities, collateralized mortgage obligations, asset-backed securities, collateralized loan obligations, collateralized debt obligations and structured notes;
- Common stock if received as a result of a conversion, corporate restructuring or recapitalization;
- Privately placed securities;
- Rights that are related to securities that are already held by the Fund; and
- Currency forwards, swaps and other certain currency derivatives, in each case for hedging purposes only.

The Fund generally invests in highly rated debt securities and will invest at least 75% of its total assets, calculated at market value at the time of purchase, in debt securities rated at least A- or its equivalent by a nationally recognized statistical rating organization (“NRSRO”). The Fund may invest: up to 25% of its total assets, calculated at market value at the time of purchase, in debt securities that are rated below A- or its equivalent by an NRSRO or that are unrated; up to 25% of its total assets, calculated at market value at the time of purchase, in securities of non-U.S. governments and corporations or in securities that are not denominated in U.S. dollars; up to 15% of its total assets, calculated at market value at the time of purchase, in stripped mortgage securities (such as interest-only and principal-only classes of collateralized mortgage obligations), collateralized mortgage obligations structured as accrual certificates, also known as Z-Bonds, and inverse floating rate debt instruments; and up to 5% of its total assets, calculated at market value at

the time of purchase, in preferred stocks. The portfolio managers may purchase or sell securities on a when-issued, delayed delivery or forward commitment basis. The portfolio managers may also invest in cash equivalent securities, which may include publicly traded securities issued by the U.S. Government or agencies of the U.S. government, certificates of deposit, commercial paper, repurchase agreements, bankers' acceptances and other similar short-term bonds.

The proportions held in various debt securities will be revised in light of the portfolio managers' appraisal of the economy, the relative yields of securities in various market sectors, the investment prospects for issuers, potential regulatory developments impacting debt securities and other factors. In selecting securities, the portfolio managers consider many factors, including yield, credit quality, liquidity, call risk, duration, macroeconomic factors and capital appreciation potential.

Principal Risks

Interest Rate Risk. As with most funds that invest in debt securities, changes in interest rates are one of the most important factors that could affect the value of an investment in the Fund. Interest rate risk is the risk that debt securities will decline in value because of increases in interest rates. If interest rates were to rise from a low level, fixed income securities markets may experience lower prices, increased volatility and lower liquidity. The negative impact on fixed income securities from rate increases, regardless of the cause, could be swift and significant, which could result in significant losses by the Fund, even if such rate increases are anticipated by FPA.

Market Risk. The market price of investments owned by the Fund may go up or down, sometimes rapidly or unpredictably. Fund investments may decline in value due to factors affecting the overall markets, or particular industries or sectors. The value of a holding may decline due to general market conditions that are not specifically related to a particular issuer, such as real or perceived adverse economic conditions, changes in the general outlook for an issuer's financial condition, changes in interest or currency rates, domestic or international monetary policy or adverse investor sentiment generally. The value of a holding may also decline due to factors that affect a particular industry or industries, such as competitive conditions within an industry or government regulations. The Fund may experience heavy redemptions that could cause the Fund to liquidate its assets at inopportune times or at a loss or depressed value, which could cause the value of an investment in the Fund to unexpectedly decline. Shareholder redemptions may also cause the Fund to engage in "odd-lot" fixed-income transactions, which due to their small size, may result in the Fund receiving substantially lower value on such transactions than if the Fund had engaged in a large block trade of such securities. In addition, the Fund may rely on various third-party sources to calculate its net asset value. Errors or systems failures and other technological issues may adversely impact the Fund's calculation of its net asset value, and such net asset value calculation issues may result in inaccurately calculated net asset values, delays in net asset value calculation and/or the inability to calculate net asset values over extended periods. The Fund may be unable to recover any losses associated with such failures.

Mortgage-Backed and Asset-Backed Risk. Mortgage-related and other asset-backed securities represent interests in "pools" of mortgages or other assets such as consumer loans or receivables held in trust and often involve risks that are different from or possibly more acute than risks

associated with other types of debt instruments. Mortgage-related securities are subject to prepayment risk and can be highly sensitive to changes in interest rates. Mortgage-backed securities, and in particular those not backed by a government guarantee, are subject to credit risk. The Fund's investments in other asset-backed securities are subject to risks similar to those associated with mortgage-related securities, as well as additional risks associated with the nature of the assets and the servicing of those assets.

Credit Risk. Credit risk refers to the likelihood that an issuer will default on the payment of principal and/or interest on a security. Various factors could affect the issuer's actual or perceived willingness or ability to make timely interest or principal payments, including changes in the issuer's financial condition or in general economic conditions.

Call Risk. Issuers of callable bonds are permitted to redeem these bonds before their final maturity. If an issuer calls a security in which the Fund is invested, the Fund could lose potential price appreciation and be forced to reinvest the proceeds in securities that bear a lower interest rate or more credit risk.

Liquidity Risk. The Fund's investments in illiquid securities may reduce the returns of the Fund because it may not be able to sell the illiquid securities at an advantageous time or price.

Large Investor Risk. Ownership of shares of the Fund may be concentrated in one or a few large investors. Such investors may redeem shares in large quantities or on a frequent basis. Redemptions by a large investor can affect the performance of the Fund, may increase realized capital gains, may accelerate the realization of taxable income to shareholders and may increase transaction costs. These transactions potentially limit the use of any capital loss carryforwards and certain other losses to offset future realized capital gains (if any). Such transactions may also increase the Fund's expenses. In addition, the Fund may be delayed in investing new cash after a large shareholder purchase, and under such circumstances may be required to maintain a larger cash position than it ordinarily would.

Management Risk. The Fund is subject to management risk as an actively managed investment portfolio. The portfolio managers will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results. The portfolio managers' opinion about the intrinsic worth or creditworthiness of a company or security may be incorrect, the portfolio managers may not make timely purchases or sales of securities for the Fund, the Fund's investment objective may not be achieved, or the market may continue to undervalue the Fund's securities. In addition, the Fund may not be able to quickly dispose of certain securities holdings. Moreover, there can be no assurance that all of the Adviser's personnel will continue to be associated with the Adviser for any length of time. The loss of services of one or more key employees of the Adviser, including the Fund's portfolio managers, could have an adverse impact on the Fund's ability to achieve its investment objective. Certain securities or other instruments in which the Fund seeks to invest may not be available in the quantities desired. In such circumstances, the portfolio managers may determine to purchase other securities or instruments as substitutes. Such substitute securities or instruments may not perform as intended, which could result in losses to the Fund.

U.S. Government Securities Risk. Certain U.S. Government securities are supported by the full faith and credit of the United States; others are supported by the right of the issuer to borrow from the U.S. Treasury; others are supported by the discretionary authority of the U.S. Government to purchase the agency's obligations; and still others are supported only by the credit of the issuing agency, instrumentality, or enterprise. Although U.S. Government-sponsored enterprises such as the Federal Home Loan Mortgage Corporation (Freddie Mac) and the Federal National Mortgage Association (Fannie Mae) may be chartered or sponsored by Congress, they are not funded by Congressional appropriations, and their securities are not issued by the U.S. Treasury, are not supported by the full faith and credit of the U.S. Government, and involve increased credit risks in comparison to U.S. Treasury securities or other securities supported by the full faith and credit of the U.S. Government.

Risks Associated with Investing in High Yield Securities. High yield bonds, which are sometimes called "junk" bonds, are highly speculative securities that are usually issued by smaller, less credit-worthy and/or highly leveraged (indebted) companies. High yield securities are generally subject to greater levels of credit, call and liquidity risks than higher-rated securities of similar maturity.

Over-the-Counter Risk. Securities traded in OTC markets may trade in smaller volumes, and their prices may be more volatile, than securities principally traded on securities exchanges. Such securities may be less liquid than more widely traded securities. In addition, the prices of such securities may include an undisclosed dealer markup, which the Fund pays as part of the purchase price.

Because of these and other risks, you could lose money by investing in the Fund.

Performance Information

The bar chart and Average Annual Total Returns table below provide an indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year and by showing how the Fund's average annual returns for 1, 5 and 10 calendar years compare with those of a broad-based securities market index and with a measure of the change in cost of living plus 100 basis points. The chart and table reflect the reinvestment of dividends and other distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

The Barclays Capital U.S. Aggregate Bond Index is a market capitalization-weighted index, meaning the securities in the index are weighted according to the market size of each bond type. Most U.S. traded investment grade bonds are represented. Municipal bonds and Treasury Inflation-Protected Securities are excluded, due to tax treatment issues. The index includes Treasury securities, Government agency bonds, mortgage-backed bonds, corporate bonds, and a small amount of non-U.S. bonds traded in the U.S. CPI + 100 is a measure of the consumer price index (CPI) plus an additional 100 basis points. The CPI is calculated by taking price changes for each item in the predetermined basket of goods and averaging them; the goods are weighted according to their importance. Changes in CPI are used to assess price changes associated with the cost of living.

To obtain updated monthly performance information, please visit the Fund’s website at www.fpafunds.com or call (800) 982-4372.

The Fund’s highest/lowest *quarterly* results during this time period were:

Highest 2.03% (Quarter ended 9/30/2007)
Lowest (0.64)% (Quarter ended 12/31/2015)

Average Annual Total Returns (for the periods ended December 31, 2016)	One Year	Five Years	Ten Years
Before Taxes	2.53%	1.37%	2.54%
After Taxes on Distributions(1)	1.52%	0.24%	1.25%
After Taxes on Distributions and Sale of Fund Shares(1)	1.43%	0.55%	1.45%
Barclays Capital U.S. Aggregate Bond Index (reflects no deductions for fees, expenses or taxes)	2.65%	2.23%	4.34%
CPI + 100	3.12%	2.37%	2.83%

(1) After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend upon an investor’s tax situation and may differ from those shown. After-tax returns presented here are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts (“IRAs”). Early withdrawal from a 401(k) account or an IRA could lead to taxation of the withdrawn amount as ordinary income and could be subject to an additional tax penalty.

Investment Adviser

First Pacific Advisors, LLC (the “Adviser”) is the Fund’s investment adviser.

Portfolio Managers

Thomas H. Atteberry, Vice President of the Fund, and Partner of the Adviser, has served as a portfolio manager since November 2004.

Abhijeet Patwardhan, Vice President of the Fund since November 2015, and Managing Director (since November 2015) and a Director of Research (since April 2015) of the Adviser, has served as a portfolio manager since November 2015.

Messers. Atteberry and Patwardhan are primarily responsible for the day-to-day management of the Fund's portfolio.

Purchase and Sale of Fund Shares

Investors may purchase or redeem Fund shares on any business day by written request, check, wire, ACH (Automated Clearing House), telephone, or through dealers as further described in this prospectus. You may conduct transactions by mail (FPA Funds, c/o UMB Fund Services, Inc., P.O. Box 2175, Milwaukee, WI 53201-2175, or 235 West Galena Street, Milwaukee, WI 53212), by wire, or by telephone at (800) 638-3060. Purchases and redemptions by telephone are only permitted if you previously established this option in your account. You can use the Account Application for initial purchases.

The minimum initial investment is \$1,500, and each subsequent investment must be at least \$100. If you are eligible, you can establish an IRA (individual retirement account) and/or other retirement plan with a \$100 minimum initial investment and an expressed intention to increase the investment to \$1,500 within 12 months. No minimum is imposed for subsequent investments in these accounts. All purchases made by check should be in U.S. dollars and made payable to the FPA Funds. Third party, starter or counter checks will not be accepted. A charge may be imposed by your bank and/or the Fund if a check does not clear.

Subsequent investments and redemptions can be made directly to UMB Fund Services, Inc.

Tax Information

The Fund's distributions are taxable and will be taxed as ordinary income and/or long-term capital gain, unless you are investing through a tax-deferred arrangement, such as an IRA or 401(k) plan.

Payments to Broker-Dealers and Other Financial Intermediaries

Brokers, dealers, banks, trust companies and other financial representatives may receive compensation from the Fund or its service providers for providing a variety of services, which may include record keeping, transaction processing for shareholders' accounts and certain shareholder services not currently offered to shareholders that deal directly with the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's web site for more information.

Details about the Fund

INVESTMENT OBJECTIVE

The Fund seeks to provide long-term total return, which includes income and capital appreciation, while considering capital preservation.

PRINCIPAL INVESTMENT STRATEGIES

The Fund's portfolio managers primarily invest in a diversified portfolio of debt securities, cash and cash equivalents. The portfolio managers will, under normal circumstances, invest in the following instruments, among others:

- Fixed income securities, including:
 - Corporate bonds, municipal bonds, bank loans, bonds issued by governments and their agencies and instrumentalities, mortgage-backed pools, sovereign debt, and supra-national agency obligations; and
 - Structured investments, commercial mortgage-backed securities, residential mortgage-backed securities, collateralized mortgage obligations, asset-backed securities, collateralized loan obligations, collateralized debt obligations and structured notes;
- Common stock if received as a result of a conversion, corporate restructuring or recapitalization;
- Privately placed securities;
- Rights that are related to securities that are already held by the Fund; and
- Currency forwards, swaps and other certain currency derivatives, in each case for hedging purposes only.

The Fund generally invests in highly rated debt securities and will invest at least 75% of its total assets, calculated at market value at the time of purchase, in debt securities rated at least A- or its equivalent by a NRSRO. The Fund may invest: up to 25% of its total assets, calculated at market value at the time of purchase, in debt securities that are rated below A- or its equivalent by an NRSRO or that are unrated; up to 25% of its total assets, calculated at market value at the time of purchase, in securities of non-U.S. governments and corporations or in securities that are not denominated in U.S. dollars; up to 15% of its total assets, calculated at market value at the time of purchase, in stripped mortgage securities (such as interest-only and principal-only classes of collateralized mortgage obligations), collateralized mortgage obligations structured as accrual certificates, also known as Z-Bonds, and inverse floating rate debt instruments; and up to 5% of its total assets, calculated at market value at the time of purchase, in preferred stocks. The portfolio managers may purchase or sell securities on a when-issued, delayed delivery or forward commitment

basis. The portfolio managers may also invest in cash equivalent securities, which may include publicly traded securities issued by the U.S. Government or agencies of the U.S. government, certificates of deposit, commercial paper, repurchase agreements, bankers' acceptances and other similar short-term bonds.

The proportions held in various debt securities will be revised in light of the portfolio managers' appraisal of the economy, the relative yields of securities in various market sectors, the investment prospects for issuers, potential regulatory developments impacting debt securities and other factors. In selecting securities, the portfolio managers consider many factors, including yield, credit quality, liquidity, call risk, duration, macroeconomic factors and capital appreciation potential.

ADDITIONAL INFORMATION ABOUT PRINCIPAL INVESTMENT STRATEGIES

To pursue the Fund's investment objective, the portfolio managers generally invest the Fund's assets in a diversified portfolio of debt securities, cash and cash equivalents, including but not limited to the following securities:

U.S. Government Securities. The U.S. government sector includes fixed-income securities issued by the U.S. government or its agencies and instrumentalities, such as U.S. Treasury and U.S. government agency securities, mortgage pass-through securities, including Government National Mortgage Association (Ginnie Mae), Federal Home Loan Mortgage Corporation (Freddie Mac) and the Federal National Mortgage Association (Fannie Mae), and agency mortgage-backed securities.

Mortgage-Backed Securities. In addition to the U.S. government mortgage-pass through securities described above, the mortgage sector includes non-agency mortgage-backed securities, such as CMOs, commercial-mortgage backed securities, residential mortgage-backed securities and single- and multi-class pass-through securities. Mortgage-backed securities represent direct or indirect participation in mortgage loans secured by real property.

Stripped Securities. Some of the U.S. government and non-agency mortgage-pass through and mortgage-backed securities in which the Fund invests are "stripped securities" *i.e.*, they represent distributions of a specific source of cash flow on a pool of mortgage assets (*e.g.* interest payments, principal payments, prepayment penalties). The Fund may invest in stripped securities which can be highly sensitive to the rate of principal payments on the underlying mortgage securities. Stripped securities can produce higher yields than more traditional securities. However, stripped mortgage securities are highly sensitive to changes in interest and prepayment rates. As a result, such securities are extremely volatile.

Asset-Backed Securities. Asset-backed securities are bonds issued through special purpose vehicles and backed by pools of loans, other receivables or other assets. Asset-backed securities are created from many types of assets, such as home equity loans, auto loans, student loans and credit card receivables. The credit quality of an asset-backed security depends on the quality and performance of the underlying assets and/or the level of any credit support provided by the securitization structure. The proportions of the Fund's portfolio invested in various types of asset-backed securities will depend on many factors, including FPA's appraisal of the economy, yield,

credit quality, macroeconomic factors and capital appreciation potential, among others. To the extent the Fund focuses its investments in a particular type of asset-backed security, it may be more susceptible to economic conditions and risks affecting the type of asset-backed security.

Corporate Debt Securities. The Fund may invest in corporate bonds, bank debt, notes and commercial paper of varying maturities and may invest in domestic bonds, bank debt and notes and those issued by non-U.S. corporations and governments. Issuers of these securities have a contractual obligation to pay interest at a specified rate on specified date and to repay principal on a specified maturity date, and may have provisions that allow the issuer to redeem or “call” the security before its maturity.

Sovereign and Government-Related Debt. Sovereign debt includes securities issued or guaranteed by a non-U.S. sovereign government or its agencies, authorities, or political subdivisions. Government-related debt includes securities issued by non-U.S. regional or local governmental entities or government-controlled entities. In the event an issuer of sovereign debt or government-related debt is unable or unwilling to make scheduled payments of interest or principal, holders may be asked to participate in a restructuring of the debt and to extend further credit to the issuer.

Non-U.S. Securities. Up to 25% of the Fund’s total assets, measured at the time of purchase, may be invested in securities of non-U.S. governments and corporations or in securities that are not denominated in U.S. dollars. Securities of non-U.S. governments and corporations entail additional risks compared to investments in securities of the U.S. government or U.S. issuers. For purposes of this prospectus, non-U.S. issuers are generally non-U.S. governments or companies organized outside the United States, but the Fund may make a different designation in certain circumstances.

Covered Bonds. Covered bonds are debt securities issued by banks and are secured by collateral, typically mortgages. In the event of a default, bondholders also have an unsecured claim against the issuing bank if the underlying collateral is insufficient to repay amounts owing in respect of the bonds.

Cash Equivalents. Cash equivalents are short-dated instruments that are readily convertible into cash. They may include bank obligations, commercial paper, and repurchase agreements. Bank obligations include certificates of deposit and bankers’ acceptances. Commercial paper is a short-term promissory note issued by a corporation, which may have a floating or variable rate. Repurchase agreements are transactions under which the Fund purchases a security from a dealer counterparty and agrees to resell the security on a specified future date at the same price, plus a specified interest rate.

Zero Coupon Securities. Special tax considerations are associated with investing in high yield bonds structured as zero coupon or pay-in-kind securities. The Fund does not receive any cash interest on such bonds until the bond matures, but the interest on these securities is accrued as income. Similarly, the inflation accretion income recorded on inflation-indexed notes is not received until maturity. The Internal Revenue Code requires the Fund to distribute such income to its shareholders. Thus, the Fund may have to dispose of securities when it might not want to in order to provide the cash necessary to make distributions to those shareholders who do not reinvest dividends.

Temporary Investments and Other Measures. As a temporary measure for defensive purposes, the Fund may invest up to 100% of its assets in short-term investments, including cash or cash equivalents, corporate debt, or direct or indirect US and non-US government and agency obligations, money market instruments, bank obligations, commercial paper, corporate notes and repurchase agreements. The Fund may make these investments or increase its investment in these securities when the managers are unable to find enough attractive long-term investments, to reduce exposure to the Fund's primary investments when the managers believe it is advisable to do so, during periods of significant shareholder redemptions or when adverse or unusual market, economic, political or other conditions exist. The Fund may take such portfolio positions for as long a period as deemed necessary. In doing so, the Fund may succeed in avoiding losses but may otherwise fail to achieve its investment objective. However, there can be no guarantee that a defensive strategy will be successful. Investing defensively may adversely affect Fund performance. During these times, the managers may make frequent portfolio holding changes, which could result in increased trading expenses and taxes, and decreased Fund performance.

As part of its normal operations, the Fund may hold cash or invest a portion of its portfolio in short-term interest bearing US dollar denominated securities, pending investments or to provide for possible redemptions. Investments in such short-term debt securities can generally be sold easily and have limited risk of loss, but earn only limited returns. The Fund may increase its cash holdings and/or such short-term investments in anticipation of a greater than normal number of shareholder redemptions.

The Adviser's emphasis on a value-oriented investment approach could result in a portfolio that does not reflect the national economy, differs significantly from broad market indices and consists of securities considered by the average investor to be unpopular or unfamiliar.

Percentage Investment Limitations. Unless otherwise stated, all percentage limitations on Fund investments listed in this prospectus will apply at the time of purchase. The Fund would not violate these limitations unless an excess or deficiency occurs or exists immediately after and as a result of an investment.

Other Investments and Techniques. The Fund may invest in other types of securities and use a variety of investment techniques and strategies which are not principal investment strategies and are not described in this Prospectus. These securities and techniques may subject the Fund to additional risks. Please see the Statement of Additional Information (the "SAI") for additional information about the securities and investment techniques described in this prospectus and about additional securities and techniques that may be used by the Fund.

ADDITIONAL INFORMATION ABOUT PRINCIPAL RISKS

Interest Rate Risk. As with most funds that invest in debt securities, changes in interest rates are one of the most important factors that could affect the value of an investment in the Fund. Interest rate risk is the risk that debt securities will decline in value because of increases in interest rates. Rising interest rates tend to cause the prices of debt securities (especially those with longer maturities) and the Fund's share price to fall. Generally, bonds with longer maturities have a greater duration and thus are subject to greater price volatility from changes in interest rates. Adjustable

rate instruments also react to interest rate changes in a similar manner although generally to a lesser degree (depending, however, on the characteristics of the reset terms, including the index chosen, frequency of reset and reset caps or floors, among other things). Low interest rates may pose heightened risks with respect to investments in fixed income securities. If interest rates were to rise from a low level, fixed income securities markets may experience lower prices, increased volatility and lower liquidity. The negative impact on fixed income securities from rate increases, regardless of the cause, could be swift and significant, which could result in significant losses by the Fund, even if such rate increases are anticipated by FPA.

Market Risk. The market price of investments owned by the Fund may go up or down, sometimes rapidly or unpredictably. Fund investments may decline in value due to factors affecting the overall markets, or particular industries or sectors. The value of a holding may decline due to general market conditions that are not specifically related to a particular issuer, such as real or perceived adverse economic conditions, changes in the general outlook for an issuer's financial condition, changes in interest or currency rates, domestic or international monetary policy or adverse investor sentiment generally. The value of a holding may also decline due to factors that affect a particular industry or industries, such as competitive conditions within an industry or government regulations. The Fund may experience heavy redemptions, which could cause the Fund to liquidate its assets at inopportune times or at a loss or depressed value, which could cause the value of an investment in the Fund to unexpectedly decline. Shareholder redemptions may also cause the Fund to engage in "odd-lot" fixed-income transactions, which due to their small size, may result in the Fund receiving substantially lower value on such transactions than if the Fund had engaged in a large block trade of such securities. In addition, the Fund may rely on various third-party sources to calculate its net asset value. Errors or systems failures and other technological issues may adversely impact the Fund's calculation of its net asset value, and such net asset value calculation issues may result in inaccurately calculated net asset values, delays in net asset value calculation and/or the inability to calculate net asset values over extended periods. The Fund may be unable to recover any losses associated with such failures.

Mortgage-Related and Asset-Backed Risk. Mortgage-related and other asset-backed securities represent interests in "pools" of mortgages or other assets such as consumer loans or receivables held in trust and often involve risks that are different from or possibly more acute than risks associated with other types of debt instruments. Mortgage-related securities are subject to prepayment risk and, thus, can be highly sensitive to changes in interest rates. Generally, in a period of rising interest rates, individual borrowers are less likely to exercise prepayment options which tends to extend the expected maturity of mortgage-related securities, making them more sensitive to changes in interest rates. As a result, if the Fund holds mortgage-related securities, rising interest rates may cause the Fund to exhibit additional volatility due to the increased expected average life of its mortgage-related holdings. When interest rates decline, borrowers may pay their mortgages sooner than expected. These prepayments can reduce the returns of the Fund because the Fund may realize losses on securities that were acquired at a premium to par and the Fund may have to reinvest the proceeds from prepayments at the lower prevailing interest rates which can reduce the Fund's yield.

Mortgage-related securities may be either pass-through securities or collateralized mortgage obligations ("CMOs"). Pass-through securities represent a right to receive principal and interest

payments collected on a pool of mortgages which are passed through to security holders. CMOs are created by dividing the principal and interest payments collected on a pool of mortgages into several cash flow streams (“tranches”) with different priority rights to portions of the underlying mortgage payments. Certain CMO tranches may represent a right to receive specific sources of cash flow such as interest-only (“IOs”) or principal-only (“POs”). These securities are frequently referred to as “stripped securities” and may be extremely sensitive to changes in interest rates. Stripped securities can produce higher yields than more traditional securities. However, stripped mortgage securities are highly sensitive to changes in interest and prepayment rates. As a result, such securities are extremely volatile. For example, generally, the value of principal-only stripped mortgage-related securities fall as interest rates rise, whereas the value of interest-only stripped mortgage-related securities rise as interest rates rise, and vice versa. If the Fund invests in CMO tranches (including CMO tranches issued by government agencies) and interest rates move in a manner not anticipated by the managers, it is possible that the Fund could lose all or substantially all of its investment. The market prices of CMOs structured as accrual certificates (also known as “Z-Bonds”) are affected to a greater extent by interest rate changes and therefore tend to be more volatile than securities which pay current interest in cash. Mortgage-related securities, and in particular those not backed by a government guarantee, are subject to credit risk.

The Fund’s investments in other asset-backed securities are subject to risks similar to those associated with mortgage-related securities, as well as additional risks associated with the nature of the assets and the servicing of those assets. Payment of principal and interest on asset-backed securities may be largely dependent upon the cash flows generated by the assets backing the securities, and asset-backed securities may not have the benefit of any security interest in the related assets. Certain asset-backed securities, including securities backed by auto loans, are subject to subprime lending and loan-to-value risk. One of the most significant risks to a holder of an auto loan asset-backed security is the fluctuation of the value of the loans acquired. The higher the loan-to-value ratio, the riskier the loan is for a lender. Further, subprime loans underlying auto loan asset-backed securities may have higher default rates than loans that meet more stringent underwriting requirements.

Credit Risk. Credit risk refers to the likelihood that an issuer will default on the payment of principal and/or interest on a security. Various factors could affect the issuer’s actual or perceived willingness or ability to make timely interest or principal payments, including changes in the issuer’s financial condition or in general economic conditions. In addition, lack of or inadequacy of collateral or credit enhancements for a fixed income security may affect its credit risk. Below investment grade securities predominantly have more risk with respect to the issuer’s ability to pay interest and repay principal when due, and therefore involve a greater risk of default or nonpayment. Credit risk of a security may change over time, and securities which are rated by ratings agencies are often reviewed and may be subject to downgrade. However, ratings are only opinions of the agencies issuing them and are not absolute guarantees as to quality.

Call Risk. Issuers of callable bonds are permitted to redeem these bonds before their final maturity. Issuers may call outstanding securities before maturity for a number of reasons, including decreases in prevailing interest rates or improvements to the issuer’s credit profile. If an issuer calls a security in which the Fund is invested, the Fund could lose potential price appreciation and be forced to reinvest the proceeds in securities that bear a lower interest rate or more credit risk.

Liquidity Risk. The Fund's investments in illiquid securities may reduce the returns of the Fund because it may not be able to sell the illiquid securities at an advantageous time or price. Investments in high yield securities, non-U.S. securities, derivatives or other securities with substantial market and/or credit risk tend to have the greatest exposure to liquidity risk. Certain investments in private placements and Rule 144A securities may be considered illiquid investments. Lower-rated debt securities tend to be less liquid than higher-rated securities. Illiquid securities may trade at a discount from comparable, more liquid investments, and may be subject to wider fluctuations in market value. Furthermore, reduced number and capacity of dealers and other counterparties to "make markets" in fixed income securities, in connection with the growth of the fixed income markets, may increase liquidity risk with respect to the Fund's investments in fixed income securities. When there is no willing buyer and investments cannot be readily sold, the Fund may have to lower the selling price, sell other investments, or may not be able to sell the securities at all and may have to forego another, more appealing investment opportunity, any of which could have a negative effect on the Fund's performance. These securities may also be difficult to value and their values may be more volatile because of liquidity risk. Increased Fund redemption activity may negatively impact Fund performance and increase liquidity risk due to the need of the Fund to sell portfolio securities. Regulatory changes may further constrain the ability of market participants to create liquidity, particularly in times of increased market volatility.

Large Investor Risk. Ownership of shares of the Fund may be concentrated in one or a few large investors. Such investors may redeem shares in large quantities or on a frequent basis. Redemptions by a large investor can affect the performance of the Fund, may increase realized capital gains, may accelerate the realization of taxable income to shareholders and may increase transaction costs. These transactions potentially limit the use of any capital loss carryforwards and certain other losses to offset future realized capital gains (if any). Such transactions may also increase the Fund's expenses. In addition, the Fund may be delayed in investing new cash after a large shareholder purchase, and under such circumstances may be required to maintain a larger cash position than it ordinarily would.

Management Risk. The Fund is subject to management risk as an actively managed investment portfolio. The portfolio managers' opinion about the intrinsic worth or creditworthiness of a company or security may be incorrect, the portfolio managers may not make timely purchases or sales of securities for the Fund, the Fund's investment objective may not be achieved, or the market may continue to undervalue the Fund's securities. In addition, the Fund may not be able to quickly dispose of certain securities holdings. Moreover, there can be no assurance that all of the Adviser's personnel will continue to be associated with the Adviser for any length of time. Certain securities or other instruments in which the Fund seeks to invest may not be available in the quantities desired. In such circumstances, the portfolio managers may determine to purchase other securities or instruments as substitutes. Such substitute securities or instruments may not perform as intended, which could result in losses to the Fund. In addition, the loss of services of one or more key employees of the Adviser, including the portfolio managers, could have an adverse impact on the Fund's ability to achieve its investment objective.

Private Placements and Restricted Securities Risk. Private placement securities are securities that are not registered under the federal securities laws, and are generally eligible for sale only to certain eligible investors. The Fund may invest in securities that are purchased in private placements.

Because there may be relatively few potential purchasers for such investments, especially under adverse market or economic conditions or in the event of adverse changes in the financial condition of the issuer, the Fund could find it more difficult to sell such securities when FPA believes it advisable to do so or may be able to sell such securities only at prices lower than if such securities were more widely held. At times, it may also be more difficult to determine the fair value of such securities for purposes of computing the net asset value of the Fund. The sale of such investments may also be restricted under securities laws.

U.S. Government Securities Risk. Certain U.S. Government securities are supported by the full faith and credit of the United States; others are supported by the right of the issuer to borrow from the U.S. Treasury; others are supported by the discretionary authority of the U.S. Government to purchase the agency's obligations; and still others are supported only by the credit of the issuing agency, instrumentality, or enterprise. Although U.S. Government-sponsored enterprises such as the Federal Home Loan Mortgage Corporation (Freddie Mac) and the Federal National Mortgage Association (Fannie Mae) may be chartered or sponsored by Congress, they are not funded by Congressional appropriations, and their securities are not issued by the U.S. Treasury, are not supported by the full faith and credit of the U.S. Government, and involve increased credit risks in comparison to U.S. Treasury securities or other securities supported by the full faith and credit of the U.S. Government. Any security guaranteed by the U.S. government or its agencies or instrumentalities, or a security backed by the U.S. Treasury or the full faith and credit of the United States, is guaranteed or backed only as to the timely payment of interest and principal when held to maturity, but the market values for such securities are not guaranteed and will fluctuate.

Any market movements, regulatory changes or changes in political or economic conditions that affect the U.S. government agencies or instrumentalities in which the Fund invests may have a significant impact on the Fund's performance. Events that would adversely affect the market prices of securities issued or guaranteed by one government agency or instrumentality may adversely affect the market price of securities issued or guaranteed by other government agencies or instrumentalities. Because many types of U.S. government securities trade actively outside the United States, their prices may rise and fall as changes in global economic conditions affect the demand for these securities.

Risks Associated with Investing in High Yield Securities. High yield bonds, which are sometimes called "junk" bonds, are highly speculative securities that are usually issued by smaller, less credit-worthy and/or highly leveraged (indebted) companies. Because investment in lower-rated or unrated securities involves greater investment risk, achievement of the Fund's investment objective is more dependent on FPA's credit analysis than with respect to the Fund's investments in higher-rated securities. FPA does not employ a rating valuation for unrated securities. Decisions to purchase and sell these securities are based on FPA's evaluation of their investment potential and not on the ratings assigned by credit agencies. Compared with investment-grade bonds, high yield bonds carry a greater degree of risk and are less likely to make payments of interest and principal. Compared to investment-grade debt securities, market developments and the financial and business conditions of the corporation issuing high yield securities influence high yield securities price and liquidity more than changes in interest rates when compared to investment grade debt securities. Lower-rated securities may be more susceptible to real or perceived adverse economic and competitive industry conditions than investment grade securities. A projection of an economic downturn, for

example, could cause a decline in the prices of lower-rated securities because the advent of a recession could lessen the ability of a highly leveraged company to make principal and interest payments on its debt securities. New laws and proposed new laws could negatively impact the market for high-yield bonds. Insufficient liquidity in the high yield bond market may make it more difficult to dispose of high yield bonds and may cause the Fund to experience sudden and substantial price declines. A lack of reliable, objective data or market quotations may make it more difficult to value high yield bonds accurately. There is no limit on the ratings of high yield securities that may be purchased or held by the Fund, and the Fund may invest in securities that are in default.

Risks Associated with Investing in Repurchase Agreements. A repurchase agreement is a short-term investment. The Fund acquires a debt security that the seller agrees to repurchase at a future time and set price. If the seller declares bankruptcy or defaults, the Fund may incur delays and expenses liquidating the security. The security may also decline in value or fail to provide income.

Sovereign Debt Risk. An issuer of sovereign debt or the governmental authorities that control the repayment of the debt may be unable or unwilling to repay principal or interest when due. In the event of a default by a governmental entity on a sovereign debt obligation, there may be few or no effective legal remedies for collecting on such debt.

Risks Associated with Investing in Non-U.S. Securities. Non-U.S. investments involve special risks not present in U.S. investments that can increase the chances that the Fund will lose money. Certain of the risks noted below may also apply to securities of U.S. issuers with significant non-U.S. operations. Investments in non-U.S. securities involve the following risks:

- The economies of some non-U.S. markets often do not compare favorably with that of the U.S. in areas such as growth of gross domestic product, reinvestment of capital, resources, and balance of payments. Some of these economies may rely heavily on particular industries or non-U.S. capital. They may be more vulnerable to adverse diplomatic developments, the imposition of economic sanctions against a country, changes in international trading patterns, trade barriers and other protectionist or retaliatory measures.
- Governmental actions—such as the imposition of capital controls, nationalization of companies or industries, expropriation of assets or the imposition of punitive taxes—may adversely affect investments in non-U.S. markets. Such governments may also participate to a significant degree, through ownership or regulation, in their respective economies.
- The governments of certain countries may prohibit or substantially restrict foreign investing in their capital markets or in certain industries. This could severely affect security prices. This could also impair the Fund’s ability to purchase or sell non-U.S. securities or transfer its assets or income back to the U.S. or otherwise adversely affect the Fund’s operations.
- Other non-U.S. market risks include exchange controls, difficulties in pricing securities, defaults on non-U.S. government securities, difficulties in enforcing favorable legal judgments in non-U.S. courts, and political and social instability. Legal remedies available to investors in some non-U.S. countries are less extensive than those available to investors in the U.S. Many non-U.S. governments supervise and regulate stock exchanges, brokers

and the sale of securities to a lesser extent than the U.S. government does. Corporate governance may not be as robust as in more developed countries. As a result, protections for minority investors may not be strong, which could adversely affect the Fund's non-U.S. holdings or exposures.

- Accounting standards in other countries are not necessarily the same as in the U.S. If the accounting standards in another country do not require as much disclosure or detail as U.S. accounting standards, it may be harder for the portfolio managers to completely and accurately determine a company's financial condition or otherwise assess a company's creditworthiness.
- Because there may be fewer investors on non-U.S. exchanges and smaller numbers of shares traded each day, it may be difficult for the Fund to buy and sell securities on those exchanges. In addition, prices of non-U.S. securities may be more volatile than prices of securities traded in the U.S.
- Non-U.S. markets may have different clearance and settlement procedures. In certain markets, settlements may not keep pace with the volume of securities transactions. If this occurs, settlement may be delayed, and the Fund's assets may be uninvested and may not be earning returns. The Fund also may miss investment opportunities or not be able to sell an investment or reduce its exposure because of these delays.
- Changes in currency exchange rates will affect the value of the Fund's non-U.S. holdings or exposures.
- The costs of non-U.S. securities transactions tend to be higher than those of U.S. transactions, increasing the transaction costs paid directly or indirectly by the Fund.
- International trade barriers or economic sanctions against non-U.S. countries may adversely affect the Fund's non-U.S. holdings or exposures.
- Global economies are increasingly interconnected, which increases the possibilities that conditions in one country or region might adversely impact a different country or region. The severity or duration of these conditions may be affected if one or more countries leave the euro currency or if other policy changes are made by governments or quasi-governmental organizations.

Risks Associated with Investing in Convertible Securities. A convertible security is a bond, debenture, or note that may be exchanged for particular common stocks in the future at a predetermined price or formula within a specified period of time. A convertible security entitles the holder to receive interest paid or accrued on the debt security until the convertible security matures or is redeemed. Prior to redemption, convertible securities provide benefits similar to nonconvertible debt securities in that they generally provide income with higher yields than those of similar common stocks. Convertible securities may entail less risk than the corporation's common stocks. Convertible securities are generally not investment grade. The risks of nonpayment of the principal and interest increase when debt securities are rated lower than investment grade or are not rated.

Risks Associated with Deep Discount Securities. The high yield securities in which the Fund may invest may from time to time include debt securities of companies that are financially troubled, in default or are in bankruptcy or reorganization. These securities are called “Deep Discount Securities” and are deeply discounted from their face value. The Fund will invest in Deep Discount Securities when FPA believes that the issuer’s financial condition is likely to improve. A debt instrument purchased at a deep discount, but prior to default, may pay a very high effective yield. If the issuer’s financial condition improves, the underlying value of the securities may increase and result in a capital gain. If the issuer cannot meet its debt obligations, however, the Deep Discount Securities may stop generating income and lose its value or become worthless. The portfolio managers will balance the benefits of Deep Discount Securities with their risks. A diversified portfolio may reduce the overall impact of a Deep Discount Security in default or reduced in value, but the risk cannot be eliminated. A lack of reliable, objective data or market quotations may make it more difficult to value deep discount securities accurately. Insufficient liquidity in the deep discount security market may make it more difficult to dispose of such securities and may cause the Fund to experience sudden and substantial price declines.

Over-the-Counter Risk. Securities traded in OTC markets may trade in smaller volumes, and their prices may be more volatile, than securities principally traded on securities exchanges. Such securities may be less liquid than more widely traded securities. In addition, the prices of such securities may include an undisclosed dealer markup, which the Fund pays as part of the purchase price.

ARM Risk. During periods of extreme fluctuations in interest rates, the resulting fluctuations of ARM rates could affect the ARMs’ market value. Most ARMs generally have annual reset limits or “caps”. Fluctuations in interest rates above these levels, thus, could cause the mortgage-backed securities to “cap out” and to behave more like long-term, fixed-rate debt securities. During periods of declining interest rates, of course, the coupon rates may readjust downward and result in lower yields. Because of this feature, the value of ARMs will likely not rise during periods of declining interest rates to the same extent as fixed-rate instruments.

Because of these and other risks, you could lose money by investing in the Fund. For more information about the Fund and its investments, please see the Fund’s SAI.

Portfolio Holdings Disclosure

A description of the Fund’s policies and procedures with respect to the disclosure of the Fund’s portfolio securities is available in the Fund’s SAI. For instructions on how to obtain an SAI, please refer to the back cover of this Prospectus.

Management of the Fund

First Pacific Advisors, LLC is the Fund’s investment adviser. Together with its predecessor organizations, the Adviser has been in the investment advisory business since 1954, and has served as the Fund’s investment adviser since 1984. The Adviser manages assets of approximately \$30 billion and serves as the investment adviser for seven investment companies, including one closed-end investment company, and more than 40 institutional and sub-advised accounts. The

Adviser is headquartered at 11601 Wilshire Boulevard, Suite 1200, Los Angeles, California 90025. The portfolio managers, who are affiliated with the Adviser, select investments for the Fund.

The total contractual management fee rate for the Fund, as a percentage of daily net assets, for the previous fiscal year was 0.50%. As of June 1, 2016, the Adviser contractually agreed to reimburse expenses in excess of 0.49% of the average daily net assets of the Fund (excluding brokerage fees and commissions, interest, taxes, shareholder service fees, fees and expenses of other funds in which the Fund invests, and extraordinary expenses) through May 31, 2017; as a result, the Fund paid the Adviser an effective management fee rate 0.47% for the previous fiscal year. Effective February 1, 2017, the Adviser has contractually agreed to reimburse expenses in excess of 0.49% of the average daily net assets of the Fund (excluding brokerage fees and commissions, interest, taxes, shareholder service fees, fees and expenses of other funds in which the Fund invests, and extraordinary expenses) through January 31, 2018.

A discussion regarding the basis for the Board of Directors' approval of the investment advisory agreement is available in the Fund's annual report dated September 30, 2016.

Portfolio Managers

Thomas H. Atteberry is a Partner of the Adviser (since October 2006).

Abhijeet Patwardhan is a Managing Director (since November 2015) and a Director of Research (since April 2015) of the Adviser. Previously Mr. Patwardhan served as Senior Vice President of the Adviser from January 2014 to November 2015 and as an analyst and Vice President of the Adviser from June 2010 to December 2013.

Messrs. Atteberry and Patwardhan are primarily responsible for the day-to-day management of the Fund's portfolio.

The SAI provides additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers and the portfolio managers' ownership of shares of the Fund.

Investing with the Fund

PURCHASE AND INVESTMENT MINIMUMS

You can purchase shares by contacting any investment dealer authorized to sell the Fund's shares. You can obtain the Account Application for initial purchases. The minimum initial investment is \$1,500, and each subsequent investment, which can be made directly to UMB Fund Services, Inc., must be at least \$100 (however, as described herein, no minimum investment amount is imposed for subsequent investments in retirement plans). All purchases made by check should be in U.S. dollars and made payable to the FPA Funds. Third party, starter or counter checks will not be accepted. A charge may be imposed if a check does not clear.

SHARE PRICE

Net Asset Value. The Fund calculates its share price, also called net asset value, as of the close of trading on the New York Stock Exchange (“NYSE”), every day the NYSE is open, normally 4:00 p.m. Eastern time. The NYSE is closed not only on weekends but also on customary holidays, which currently are New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. Non-U.S. securities owned by the Fund may trade on weekends or other days when the Fund does not price its shares. As a result, the Fund’s net asset value may change on days when you will not be able to purchase or redeem the Fund’s shares. The share price is rounded to the nearest cent per share and equals the market value of all portfolio securities plus other assets, less all liabilities, divided by the number of Fund shares outstanding. Orders received by dealers before the NYSE closes on any business day are priced based on the share price for that day. Orders received by UMB Fund Services, Inc. at the Fund’s P.O. Box address are priced based upon the Fund’s share price at the close of trading on the day received at the P.O. Box.

The Fund uses various methods and inputs to establish the value of its investments, other assets and liabilities. Use of particular methods and inputs may vary over time based on availability and relevance as market and economic conditions evolve. Equity securities are generally valued each day at the official closing price of, or the last reported sale price on, the exchange or market on which such securities are principally traded, as of the close of business on that day. If there have been no sales that day, equity securities are generally valued at the last available bid price. Securities that are unlisted and fixed income and convertible securities listed on a national securities exchange for which the over-the-counter market more accurately reflects the securities’ value in the judgment of the Fund’s officers are valued at the most recent bid price. However, most fixed income securities are generally valued at prices obtained from pricing vendors. Vendors value such securities based on one or more of the following inputs: transactions, bids, offers quotations from dealers and trading systems, spreads and other relationships observed in the markets among comparable securities, benchmarks, underlying equity of the issuer, and proprietary pricing models such as cash flows, financial or collateral performance and other reference data (includes prepayments, defaults, collateral, credit enhancements, and interest rate volatility). Securities that are unlisted and fixed-income and convertible securities listed on a national securities exchange for which the over-the-counter market more accurately reflects the securities’ value in the judgment of the Fund’s officers, are valued at the most recent bid price. Short-term corporate notes with maturities of 60 days or less are valued at amortized cost.

Securities for which representative market quotations are not readily available or are considered unreliable by the Adviser are valued as determined in good faith under fair valuation procedures adopted by authority of the Board. For example, if trading in a security has been halted, suspended or otherwise materially restricted; a security has been de-listed from a national exchange; a security has not been traded for an extended period of time; there is other data that may call into question the reliability of market quotations; or if events occur between the close of markets outside the United States and the close of regular trading on the NYSE that, in the opinion of the Adviser, materially affect the value of any of the Fund’s securities that trade principally in those international markets, those securities will be valued in accordance with such fair value procedures. Various inputs may be reviewed in order to make a good faith determination of a security’s value. These

inputs include, but are not limited to, the type and cost of the security; financial statements of issuer; size of holding; contractual or legal restrictions on resale of the security; relevant financial or business developments of the issuer; actively traded similar or related securities; conversion or exchange rights on the security; related corporate actions; significant events occurring after the close of trading in the security; changes in overall market conditions, reports prepared by internal or external analysts, third party pricing consultants and/or industry experts; and other factors that the Fund's valuation committee reasonably believes to be relevant under the circumstances. Special valuation considerations may apply with respect to "odd-lot" fixed-income transactions, which due to their small size, may receive evaluated prices by pricing services that reflect a large block trade and not what actually could be obtained for the odd-lot position. Fair valuations and valuations of investments that are not actively trading involve judgment and may differ materially from valuations of investments that would have been used had greater market activity occurred. Use of fair valuation procedures is intended to result in more appropriate net asset values. In addition, such use is intended to reduce potential arbitrage opportunities otherwise available to short-term investors.

Additional fair value procedures are followed to address issues related to Fund holdings outside the United States. Non-U.S. securities held by the Fund trade in markets that open and close at different times, reflecting time zone differences. If significant events occur after the close of a market (and before the Fund's net asset value is next determined) which affect the value of these portfolio securities, appropriate adjustments from closing market prices may be made to reflect these events. Events of this type could include, for example, significant price changes in other markets (e.g., U.S. debt markets).

Orders received by authorized dealers, certain retirement plans and certain other financial intermediaries before the NYSE closes, if communicated to UMB Fund Services, Inc. by later deadlines on the following business day, are priced at the share price for the prior business day. The share price for sales (redemptions) of Fund shares is the first share price determined after UMB Fund Services, Inc. receives a properly completed request, except that sale orders received by an authorized dealer, certain retirement plans and certain other financial intermediaries before the NYSE closes are priced at the closing price for that day if communicated to UMB Fund Services, Inc. within the times specified by the Fund. No other action is required by the shareholder who places an order with a financial intermediary.

How to Buy Fund Shares

Investors may purchase Fund shares on any business day by written request, check, wire, ACH (Automated Clearing House), telephone, or through dealers as further described in this prospectus. You may conduct transactions by mail (FPA Funds, c/o UMB Fund Services, Inc., P.O. Box 2175, Milwaukee, Wisconsin 53201-2175, or 235 West Galena Street, Milwaukee, Wisconsin 53212), by wire, or by telephone at (800) 638-3060. Purchases and redemptions by telephone are only permitted if you previously established this option in your account. You can use the Account Application for initial purchases.

The minimum initial investment is \$1,500, and each subsequent investment must be at least \$100. If you are eligible, you can establish an IRA and/or other retirement plan with a \$100 minimum initial investment and an expressed intention to increase the investment to \$1,500 within 12 months.

No minimum is imposed for subsequent investments in these accounts. All purchases made by check should be in U.S. dollars and made payable to the FPA Funds. Third party, starter or counter checks will not be accepted. A charge may be imposed if a check does not clear.

Subsequent investments can be made directly to UMB Fund Services, Inc.

How to Redeem Your Shares

Redeeming (Selling) Your Shares—Redemption Payments May Be Made By Check, Wire or ACH. You can redeem (sell) for cash without charge (except a 2% redemption fee, if applicable, as described below) any or all of your Fund shares at any time by sending a written request to UMB Fund Services, Inc. Faxes are not acceptable. You can also place redemption requests through dealers, but they may charge a fee. If you are selling Fund shares from a retirement plan, you should consult the plan documentation concerning federal tax consequences and consult your plan custodian about applicable procedures for selling Fund shares.

A check will be mailed to you within seven days after UMB Fund Services, Inc. receives a properly completed request (as described below under “Written Requests”). If you purchase shares by check and request a redemption before the check has cleared, the Fund may postpone payment of your redemption proceeds up to 15 days while the Fund waits for the check to clear.

The right of redemption can be suspended and the payment therefore may be postponed for more than seven days during any period when: (a) the NYSE is closed for other than customary weekends or holidays; (b) trading on the NYSE is restricted; (c) an emergency exists as a result of which disposal by the Fund of securities it owns is not reasonably practicable or it is not reasonably practicable for the Fund to fairly determine the value of its net assets; or (d) the Securities and Exchange Commission, by order, so permits.

2% Redemption Fee. The Fund will deduct a 2% redemption fee from the redemption proceeds of any shareholder redeeming shares of the Fund held for less than 90 days. In determining how long shares of the Fund have been held, the Fund assumes that shares held by the investor the longest period of time will be sold first.

The ability of the Fund to assess the redemption fee on the underlying shareholders of omnibus accounts maintained by brokers, retirement plan accounts and approved fee-based program accounts is severely limited in those instances in which the broker, retirement plan administrator or fee-based program sponsor maintains the underlying shareholder account and may be further limited by their systems limitations. Further, the Fund may not apply the redemption fee to certain types of redemptions that officers of the Fund believe are not part of a pattern of frequent trading to profit from short-term securities market fluctuations, such as: redemptions of shares through automatic rebalancing programs or systematic withdrawal plans; redemptions requested for hardships such as the death or disability of the shareholder (or, if a trust, its beneficiary); redemptions for certain retirement plan transactions such as closing *de minimis* accounts, loans, plan fees, required minimum distributions, return of excess contributions, QDRO (qualified domestic relations order), automatic payroll contributions, and withdrawals at termination; redemptions requested for a QDIA (qualified default investment alternative) or redemptions initiated by the Fund. The 2% redemption fee does

not apply to shares acquired through reinvested dividends or capital gain distributions. The 2% redemption fee is applied to the lesser of the purchase or redemption price if the redemption reduces the account to less than the original investment. The redemption fee is withheld from the redemption proceeds and paid to the Fund in order to defray the costs associated with such redemption. The 2% redemption fee may be waived for other reasons, as discussed in more detail in the SAI.

Written Requests. Requests must be signed by the registered shareholder(s). If you hold a stock certificate, it must be included with your written request. A signature guarantee is required if the redemption is:

- Made payable to someone other than the registered shareholder or to somewhere other than the registered address; or
- By a shareholder that is a corporation, partnership, trust or fiduciary.

A signature guarantee must be a Stamp 2000 Medallion Signature Guarantee and can be obtained from a bank or trust company; a broker or dealer; a credit union; a national securities exchange, registered securities association or clearing agency; or a savings and loan association. Additional documents such as articles of incorporation, business licenses, partnership agreements or trust documents may be required for sales by corporations, partnerships, trusts, fiduciaries, executors or administrators.

Telephone Transactions. You must elect the option on the Account Application to have the right to sell your shares by telephone. If you wish to make an election to have the right to sell your shares via telephone or to change such an election after opening an account, you will need to complete an Account Privileges Change Form with a signature guarantee. Sales via telephone are not available for shares in certificate form.

If you have elected the option to sell your Fund shares by telephone, you may direct that a check for the proceeds payable to the shareholder of record be mailed to the address of record or you may designate a bank account to receive the proceeds of such redemptions. There is a \$3.50 charge per wire. No telephone redemptions to the address of record will be processed within 30 days of a change in the address of record.

UMB Fund Services, Inc. uses procedures it considers reasonable to confirm redemption instructions via telephone, including requiring account registration verification from the caller and recording telephone instructions. Neither UMB Fund Services, Inc. nor the Fund is liable for losses due to unauthorized or fraudulent instructions if there is a reasonable belief in the authenticity of received instructions and reasonable procedures are employed. During periods of significant economic or market changes, it may be difficult to sell your shares by telephone.

The Fund can change or discontinue telephone redemption privileges without notice.

Automatic Redemption (Sale) of Your Shares. If as a result of a redemption, your account value falls below \$500, the Fund can direct UMB Fund Services, Inc. to redeem your remaining Fund

shares. In such case, you will be notified in writing that your account value is insufficient and be given up to 60 days to increase it to \$500.

Escheatment. If your account is deemed “abandoned” or “unclaimed” under state law, the Fund may be required to “escheat” or transfer the assets in your account to the applicable state’s unclaimed property administration. The state may sell escheated Fund shares and, if you subsequently seek to reclaim your proceeds of liquidation from the state, you may only be able to recover the amount received when the shares were sold. It is your responsibility to ensure that you maintain a correct address for your account, keep your account active by contacting the Fund’s transfer agent or distributor by mail or telephone or accessing your account through the Fund’s website at least once a year, and promptly cash all checks for dividends, capital gains and redemptions. Neither the Fund, the Fund’s transfer agent, the Fund’s distributor nor the Adviser or its affiliates will be liable to shareholders or their representatives for good faith compliance with state escheatment laws.

Excessive Trading and Market Timing. The Fund is not intended as a vehicle for frequent trading and/or market timing in an attempt to profit from short-term fluctuations in the securities markets and does not accommodate frequent trading. The Board has adopted policies and procedures designed to deter or prevent frequent purchases and redemptions. Such trading could interfere with the efficient management of the Fund’s portfolio, increase brokerage and administrative costs and dilute the value of Fund shares held by long-term investors. The 2% redemption fee is intended to serve as a deterrent to frequent trading on shares held less than 90 days. The preceding section titled “2% Redemption Fee” provides a description of how this redemption fee is applied. In addition, exchanges between this Fund and the other FPA Funds are limited to no more than four exchanges during any calendar year (see the section titled “How to Exchange Your Shares”). Irrespective of these redemption fee charges and exchange limits, the Fund reserves the right to reject any purchase request (including in connection with an exchange) if management determines in its discretion that the request may be part of a pattern of excessive trading that could adversely affect the Fund. Notifications will be made in writing by the Fund within five days. There can be no assurance that the Fund will successfully detect or prevent market timing.

How to Exchange Your Shares

You can add to an existing FPA Fund account or start a new FPA Fund account by exchanging your shares of the Fund for shares of other FPA Funds, namely FPA Capital Fund, Inc., FPA Crescent Fund, FPA International Value Fund, FPA Paramount Fund, Inc., and FPA U.S. Value Fund, Inc. The availability of shares of FPA Capital Fund, Inc. to new investors is limited as described in the FPA Capital Fund, Inc. prospectus.

The Fund can change or discontinue the right to exchange Fund shares into other FPA Funds upon 60 days’ notice to shareholders. In the case of an exchange of shares subject to a 2% redemption fee within 90 days of purchase, the shares acquired by exchange also are subject to a 2% redemption fee if redeemed (except by exchange) within 90 days of the exchange (not the initial purchase).

You can exercise your exchange privileges either by written instructions or telephone (telephone exchange privileges are available unless you specifically decline them on the Account Application).

Exchanges and purchases are effected at the share price next determined after receipt of a proper request (as described above under “Written Requests”) by UMB Fund Services, Inc.

For federal income tax purposes, an exchange is treated as including a sale of Fund shares and could result in a capital gain or loss.

Exchanges are subject to the following restrictions:

- You are limited to four exchanges in one account during any calendar year;
- Shares must be owned 15 days before exchanging, and cannot be in certificate form unless you deliver the certificate when you request the exchange;
- An exchange requires the purchase of shares with a value of at least \$1,000; and
- Exchanges are subject to the same signature and signature guarantee requirements applicable to the redemption of shares.

For more information or for prospectuses for other FPA Funds, please contact a dealer or UMB Distribution Services, LLC. You should read the prospectuses of these other Funds and consider differences in objectives and policies before making any exchange.

Other Shareholder Services

Investment Account. Each shareholder has an investment account in which UMB Fund Services, Inc. holds Fund shares. You will receive a statement showing account activity after each transaction. Unless you make a written request, stock certificates will not be issued. Stock certificates are only issued for full shares.

In-Kind Transactions. Subject to procedures adopted by the Fund’s Board of Directors and at the Fund’s sole discretion, you may pay for shares of the Fund with securities instead of cash.

The Fund has agreed to redeem shares, with respect to any one shareholder of record during any 90-day period, solely in cash up to the lesser of \$250,000 or 1% of the net asset value of the Fund at the beginning of the period. Pursuant to procedures adopted by the Fund’s Board of Directors, the Fund reserves the right in its sole discretion to honor any redemption request in excess of the foregoing limits by making payment in whole or in part in readily marketable securities chosen by the Fund and valued as such securities are valued for purposes of computing the Fund’s net asset value. If payment is made in securities, a shareholder may incur transaction expenses in converting those securities to cash, may realize, upon receipt, a gain or loss for tax purposes, and will be exposed to market risk prior to and upon the sale of such securities or other property.

Pre-authorized Investment Plan. You may establish an account with a \$100 minimum initial investment and the establishment of automatic monthly investments of at least \$100. To make automatic monthly investments, you must complete the Account Application available from dealers

or UMB Distribution Services, LLC. UMB Fund Services, Inc. will withdraw funds from your bank account monthly for \$100 or more as specified through the Automated Clearing House.

Retirement Plans. A retirement plan account and/or an IRA can be established with a \$100 minimum initial investment and an expressed intention to increase the investment to \$1,500 within 12 months. No minimum is imposed for subsequent investments in these accounts. UMB Fund Services, Inc. currently charges a \$15 distribution fee for each redemption or recharacterization from a retirement account. UMB Fund Services, Inc. also charges an annual account maintenance fee of \$15 on retirement accounts.

You should consult your tax adviser about the implications of investing in Fund shares through a retirement account. Persons with earned income ineligible for deductible contributions generally may make non-deductible contributions to an IRA. The earnings on shares held in an IRA are generally tax-deferred. In addition, although contributions to a Roth IRA are not deductible, earnings in the account generally are not taxed even on withdrawal. Retirement-related tax matters are complicated and you should consult your tax adviser about them. UMB Distribution Services, LLC and dealers have applicable forms and information regarding plan administration, custodial fees and other plan documents.

Systematic Withdrawal Plan. If you have an account with a value of \$10,000 or more, you can make monthly, quarterly, semi-annual or annual withdrawals of \$50 or more by electing this option on the Account Privileges Change Form. Under this arrangement, sufficient Fund shares will be sold to cover the withdrawals and the proceeds will be forwarded to you as directed on the Account Privileges Change Form. If withdrawals continually exceed reinvestments, your account will be reduced and ultimately exhausted. Please note that concurrent withdrawals and purchases are ordinarily not in your best interest and you generally will recognize any taxable gains or losses on the withdrawals.

Shareholder Servicing Arrangements. Brokers, dealers, banks, trust companies and other financial representatives may receive compensation from the Fund or its service providers for providing a variety of services. This section briefly describes how the financial representatives may get paid.

For providing certain services to their clients, financial representatives may be paid a fee based on the assets or number of accounts of the Fund that are attributable to the financial representative. These services may include recordkeeping, transaction processing for shareholders' accounts and certain shareholder services not currently offered to shareholders that deal directly with the Fund. In addition, your financial representatives may charge you other account fees for buying or redeeming shares of the Fund or for servicing your account. Your financial representative should provide you with a schedule of its fees and services.

The Fund may pay all or part of the fees paid to financial representatives. The Fund does not pay these service fees on shares purchased directly. In addition, the Adviser may, at its own expense, pay financial representatives for these services.

UMB Distribution Services, LLC, the Fund's principal underwriter, may enter into agreements with selling dealers where the selling dealer waives its right to shareholder servicing fees for selling Fund shares or servicing shareholder accounts. These arrangements typically are intended to avoid duplicate payment of fees where the selling dealer's transactions are through an omnibus account with a different clearing broker and that broker is entitled to receive shareholder servicing fees from the Fund.

The Adviser may, at its own expense and out of its own resources, pay financial representatives for distribution and marketing services performed with respect to the Fund. These payments by the Adviser may include one or more of the following types of payments: one-time account establishment fees, annual per-account fees and/or annual asset-based charges. These payments may create a conflict of interest by influencing the broker or financial intermediary and your salesperson to recommend the Fund over another investment. For more information, ask your salesperson or visit your financial intermediary's website.

Distributions and Taxes

DISTRIBUTIONS

The Fund earns income from its investments and distributes that income, if and to the extent it exceeds expenses, to its shareholders as dividends. The Fund also realizes capital gains and losses from the sale or exchange of its investments and distributes any net capital gains to its shareholders as capital gain distributions (as used in this section, together with income dividends, "distributions"). The Fund distributes income dividends quarterly and other distributions, if any, at least annually.

Distributions the Fund pays may be reinvested automatically in Fund shares at net asset value or taken in cash. If your account is held directly with the Fund and you would like to receive distributions in cash, contact UMB Fund Services, Inc. at 800-638-3060. If your account is with a securities dealer or other financial intermediary that has an agreement with the Fund, contact your dealer or intermediary about which option you prefer.

TAXES

Except for tax-advantaged retirement plans and accounts and other tax-exempt investors, all Fund distributions you receive generally are subject to federal income tax, whether you receive them in cash or reinvest them in additional shares. Fund distributions to IRAs (including Roth IRAs) and qualified retirement plans generally are tax-free.

Distributions of net investment income, the excess of net short-term capital gain over net long-term capital loss, and net gains (if any) from certain non-U.S. currency transactions (*i.e.*, "dividends") are generally taxed as ordinary income. The Fund's dividends attributable to "qualified dividend income" (generally, dividends it receives on stock of most U.S. and certain non-U.S. corporations with respect to which the Fund satisfies certain holding period and other restrictions) are subject to federal income tax for individual and certain other non-corporate shareholders (each, an "individual shareholder") who satisfy those restrictions with respect to their Fund shares at the rates for long-term capital gains—a maximum of 15% or 20%, depending on whether the individual

shareholder's income exceeds certain threshold amounts. Given the Fund's investment strategies, it is not expected that a significant portion of the dividends paid by the Fund will be eligible to be designated as qualified dividend income.

Distributions of net capital gain (*i.e.*, the excess of net long-term capital gain over net short-term capital loss) are generally taxed as long-term capital gain and, for individual shareholders, are subject to the 15% or 20% maximum federal income tax rates mentioned above. The tax treatment of capital gain distributions from the Fund depends on how long the Fund held the securities it sold that generated the gain, not when you bought your Fund shares or whether you reinvested your distributions.

Fund distributions generally are taxable to you in the year you receive them. In some cases, however, distributions you receive in January are taxable as if they had been paid the previous December 31.

When you sell (redeem) Fund shares, including pursuant to an exchange, you generally will realize a taxable gain or loss. An exception, once again, applies to tax-advantaged retirement plans and accounts and other tax-exempt investors. Any capital gain that an individual shareholder recognizes on a redemption of his or her Fund shares that have been held for more than one year will qualify for the 15% or 20% maximum federal income tax rates mentioned above.

The federal income tax you actually owe on Fund distributions and share transactions can vary with many factors, such as your marginal tax bracket, how long you held your shares and whether you owe federal alternative minimum tax. Shortly after the end of each calendar year, the Fund will send you a tax statement that will detail the distributions you received during that year and will show their tax status. This may be separate from the statement that covers your share transactions. Most importantly, consult your tax professional. Everyone's tax situation is different, and your tax professional should be able to help you answer any questions you may have.

The Fund is required to withhold 28% of the money you are otherwise entitled to receive from its distributions and redemption proceeds (regardless of whether you realize a gain or loss) if you are an individual shareholder who fails to provide a correct taxpayer identification number to the Fund (together with the withholding described in the next sentence, "backup withholding"). Withholding at that rate also is required from the Fund's distributions to which you are otherwise entitled if you are such a shareholder and the Internal Revenue Service ("Service") tells the Fund that you are subject to backup withholding or you are subject to backup withholding for any other reason. Backup withholding is not an additional tax, and any amounts so withheld may be credited against a shareholder's federal income tax liability or refunded.

If you buy shares when the Fund has earned or realized, but not yet distributed, ordinary income or net capital gains, you will be "buying a dividend" by paying the full price of the shares and then receiving a portion of the price back in the form of a taxable distribution. You can avoid this situation by waiting to invest until after the record date for the distribution.

Distributions are taxable to you even if they are paid from income or gain earned by the Fund before your investment (and thus were included in the price you paid for your Fund shares).

Generally, if you are investing in the Fund through a tax-advantaged retirement plan or account, distributions paid by the Fund are not taxable to you on a current basis (but may be taxable upon withdrawal from such plan or account).

An individual is required to pay a 3.8% tax on the lesser of (1) the individual's "net investment income," which generally includes distributions the Fund pays and net gains realized on the redemption or exchange of Fund shares, or (2) the excess of the individual's "modified adjusted gross income" over a threshold amount (\$250,000 for married persons filing jointly and \$200,000 for single taxpayers). This tax is in addition to any other taxes due on that income. A similar tax applies to estates and trusts. Shareholders should consult their own tax advisers regarding the effect, if any, this provision may have on their investment in Fund shares.

A Fund shareholder's basis in Fund shares he or she acquired or acquires after December 31, 2011 ("Covered Shares"), will be determined in accordance with the Fund's default method, which is HIFL (highest in, first long-term) basis, unless the shareholder affirmatively elects in writing (which may be electronic) to use the average basis method or a different acceptable basis determination method (*e.g.*, a specific identification method). The method a Fund shareholder elects (or the default method) may not be changed with respect to a redemption of Covered Shares after the settlement date of the redemption.

In addition to the requirement to report the gross proceeds from the redemption of shares, the Fund (or its administrative agent) must report to the Service and furnish to its shareholders the basis information for Covered Shares and indicate whether they had a short-term (one year or less) or long-term (more than one year) holding period. Fund shareholders should consult with their tax advisers to determine the best Service-accepted basis method for their tax situation and to obtain more information about how the basis reporting law applies to them.

Shareholders other than U.S. persons may be subject to a different U.S. federal income tax treatment, including withholding tax at the rate of 30% on amounts treated as ordinary dividends from the Fund, as discussed in more detail in the SAI.

This section summarizes some of the consequences under current federal income tax law of an investment in the Fund. It is not a substitute for personal tax advice. **Consult your tax adviser about the potential tax consequences of an investment in the Fund under all applicable tax laws.**

Financial Highlights

The financial highlights table is intended to help you understand the Fund's financial performance for the past five years. Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned or lost on an investment in the Fund purchased at net asset value and assuming reinvestment of all dividends and other distributions. The information for each of the five years ended September 30, 2016, have been audited by Deloitte & Touche LLP, an independent registered public accounting firm, whose report dated November 18, 2016, along with the Fund's financial statements and related notes, is included in the Fund's annual report, which is available upon request.

	Year Ended September 30,				
	2016	2015	2014	2013	2012
Per share operating performance:					
Net asset value at beginning of year	\$ 10.08	\$ 10.24	\$ 10.45	\$ 10.70	\$ 10.84
Income from investment operations:					
Net investment income*	0.19	0.15	0.30	0.28	0.27
Net realized and unrealized loss on investment securities	(0.04)	(0.06)	(0.15)	(0.21)	(0.04)
Total from investment operations	\$ 0.15	\$ 0.09	\$ 0.15	\$ 0.07	\$ 0.23
Less distributions:					
Dividends from net investment income	(0.17)	(0.25)	(0.36)	(0.32)	(0.37)
Redemption fees	—**	—**	—**	—**	—**
Net asset value at end of year	\$ 10.06	\$ 10.08	\$ 10.24	\$ 10.45	\$ 10.70
Total investment return***	1.52%	0.84%	1.47%	0.66%	2.18%
Ratios/supplemental data:					
Net assets, end of year (in \$000's)	\$ 5,048,610	\$ 5,636,518	\$ 5,829,865	\$ 5,032,567	\$ 5,091,681
Ratio of expenses of average net assets:					
Before reimbursement from Adviser	0.58%	0.58%	0.56%	0.58%	0.57%
After reimbursement from Adviser	0.55%	N/A	N/A	N/A	N/A
Ratio of net investment income to average net assets:					
Before reimbursement from Adviser	1.87%	1.50%	2.59%	2.74%	2.21%
After reimbursement from Adviser	1.90%	N/A	N/A	N/A	N/A
Portfolio turnover rate	44%	64%	97%	84%	77%

* Per share amount is based on average shares outstanding.

** Rounds to less than \$0.01 per share.

*** Return is based on net asset value per share, adjusted for reinvestment of distributions.

OTHER FUND INFORMATION

Annual/Semi-Annual Report to Shareholders

Additional information about the Fund's investments and performance is available in the Fund's annual and semi-annual reports to shareholders. In the Fund's annual report, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund's performance during its last fiscal year. The Fund's SAI, annual and semi-annual report, quarterly schedules of portfolio holdings on Form N-Q and the annual report of proxy voting record on Form N-PX are available without charge, upon request, by calling UMB Distribution Services, LLC and on the Securities and Exchange Commission's ("SEC") Internet Web Site at <http://www.sec.gov>.

Statement of Additional Information (SAI)

The SAI contains more detailed information on all aspects of the Fund. A current SAI has been filed with the SEC and is incorporated by reference into this Prospectus. The SAI and other related materials about the Fund are available for review or to be copied at the SEC's Public Reference Room in Washington, D.C. (1-202-551-8090) or from the EDGAR database on the SEC's Internet Web Site at <http://www.sec.gov>, and copies of this information may be obtained, upon payment of a duplicating fee, by electronic request at publicinfo@sec.gov or by writing the Public Reference Section of the SEC, Washington, D.C. 20549-1520.

For more information or to request a free copy of any of the documents above contact UMB Distribution Services, LLC at 235 West Galena Street, Milwaukee, Wisconsin 53212, or (800) 982-4372, except from Alaska, Hawaii, Puerto Rico and U.S. Virgin Islands (where you may call collect (310) 473-0225), or go to <http://www.fpafunds.com>.

Investment Company Act No. 811-1735
